

(AST Y2K Statement)

Y2K Statement

The information provided on the Year 2000 Internet web site pages of AST Computers, LLC ("AST") constitute a Year 2000 Readiness Disclosure under the "Year 2000 Information and Readiness Disclosure Act of 1998" (Public Law 105-271).

Information regarding the Year 2000 contained in AST's past and present promotional materials are also Year 2000 Readiness Disclosures under the Act.

Information on our Year 2000 Internet web site pages regarding non-AST products and services are "Republications" under the Act based on information supplied by other companies about the products and services they offer. AST has not independently verified the contents of these Republications and takes no responsibility for the accuracy or completeness of information contained in such Republications.

General Information regarding Y2K Issue

The Year 2000 (Y2K) issue results from the manner in which dates have been historically programmed into computer hardware and software. Many currently installed computer systems and software products are coded to accept or recognize only two-digit entries in each date code field (i.e., MM/DD/YY). These systems may recognize a date using the year "00" as the year 1900 rather than the year 2000. Compliance Status of AST Products
There is no standard industry-wide definition for "Year 2000 Compliance". AST Computers, LLC ("AST") has defined a computer system as being year 2000 compliant if (i) the BIOS supports millennium (8 digit) date format (mm/dd/yyyy); (ii) the BIOS clock will automatically roll over to the year 2000 at midnight on December 31, 1999; and (iii) the year 2000 is properly recognized and treated as a leap year. Under this definition, all new computers introduced and sold by AST on or after February 1, 1999 are year 2000 compliant. To verify Year 2000 compliance, AST thoroughly tests its computers using the Microsoft® Millennium test.

Year 2000 compliance information regarding AST brand products introduced and sold prior to February 1, 1999 is available at Ari-service.com.

Limited Warranty Support

AST warrants that, for all AST computers defined as year 2000 compliant, using the definition set forth above, the BIOS clock will automatically roll over to the year 2000 at midnight on December 31, 1999 and will properly recognize and treat the year 2000 as a leap year. AST will treat any product

failure in this regard as a covered event under AST's limited warranty accompanying the product, subject to all of the terms, conditions, limitations and exclusions included in such limited warranty.* Except for this clarification of AST's warranty for hardware warranted to be year 2000 compliant, all other warranties, conditions and remedies, express or implied, relating to year 2000 readiness or compliance are disclaimed. This limited warranty extends only to hardware and BIOS. AST makes no warranty whatsoever as to the year 2000 compliance status of any application software, operating system, or peripheral accompanying and/or later installed on any AST system since AST does not control the design of these products. AST makes no representations or warranties concerning AST computer configurations that are in any way altered or modified in terms of their date-recognition functionality after any such system physically leaves AST's facilities.

*THE LIMITED WARRANTIES FOR AST PRODUCTS ARE SET FORTH EXCLUSIVELY IN THE DOCUMENTATION ACCOMPANYING THE PRODUCTS AS CLARIFIED BY ANY SPECIFIC WARRANTIES SET FORTH IN THIS PROGRAM. AST IS NOT LIABLE FOR DAMAGES CAUSED BY PRODUCTS OR THE FAILURE OF PRODUCTS TO PERFORM, INCLUDING ANY LOST PROFITS, LOST SAVINGS, INCIDENTAL DAMAGES, OR CONSEQUENTIAL DAMAGES. THIS LIMITATION APPLIES WHETHER DAMAGES ARE SOUGHT UNDER WARRANTY, TORT (INCLUDING NEGLIGENCE AND STRICT PRODUCT LIABILITY), CONTRACT OR ANY OTHER CLAIM, AND WILL BE EFFECTIVE EVEN IF AST OR A REPRESENTATIVE OF AST HAS BEEN ADVISED OF THE POSSIBILITY OF THESE DAMAGES.
